Interesting facts

- Plants are a living thing that use sunlight to make their own food.

- Plants have different parts and they are the roots, stem, leaves and flowers

- Trees are tall, woody plants. They usually have a stem called a trunk.

- Other parts of a tree include leaves, branches, bark, roots and crown.

- Some trees can live for hundreds or thousands of years.

- Lincolnshire is the ideal place for growing plants as the ground is so flat and the soil is very fertile.

- Places are made up of both physical (natural e.g. rivers, sea, hills) and human features (man-made e.g. shops, houses, farms).

Key Vocabulary	Definition
Plants	One of a large group of living things that use sunlight to make their own food. Most **plants** have leaves, stems, roots and either flowers or fruits
Soil	The loose surface material of the earth in which plants grow.
Flower	A part of the plant that attracts insects and birds
Leaves	A part of the plant that absorbs sunlight.
Stem	A plant part that supports the flower/plant.
Roots	A part of the plants that absorbs nutrients.
Trunk	The main stem of a tree.
Branches	A natural parting in the plants trunk (stem)
Bark	The bark is the skin of a tree and covers the whole of the trunk
Human feature	Things that have been built by people (man-made).
Physical feature	Naturally occurring.

Know how to / Activity

- identify common plants and flowers.
- Know the structure of flowering plants including trees.
- Plant seeds.
- Make a collage of different textures.
